

# DK-LOK

## Fittings & Valves

DK-LOK® fittings and valves are manufactured to the most stringent industry standards. As a result, DK-LOK® is one of the most certified tube fitting and valve manufacturers in the world. Our guarantee is a leak-tight seal in process, power, and instrumentation applications. Our commitment is to provide our clients reliable products and unparalleled customer service.

VH86 Ball Valve

V15 Series Needle Valves

### BALL VALVES

- High flow in a compact design with high-pressure capacity designed with a blow-out proof with internally loaded ball stem
- Micro-finished ball provides a positive seal and 90-degree actuation for 2-way and 180-degree actuation for 3-way ball valves
- Panel mounting as standard, chevron stem seal, adjustable stem packing with the handle removed – \*Handle indicates flow direction with low operating torques and positive handle stops

### NEEDLE VALVES

- DK-LOK® forged body needle valves offer precise fluid system flow control with pressure capability up to 5,000 PSI. Hard chrome plated stem threads assure long service life with a choice of three stem types; metal to metal Vee stem, metal to metal Regulating stem and repetitive soft seat Kel-F stem for gas service. Available in 316 stainless steel, brass and monel with a variety of end connections such as reliable DK-Lok single or double ferrule compression tube fitting ends, female and male NPT and British Standard Pipe Tapered threads. Handles and stem packing options to meet your system requirements.
