

Parker's comprehensive range of fittings and quick couplings will keep your application up and running with reliable-leak free connections that outperform in the toughest environments. No matter what your application, we have the fittings and couplings to help you avoid costly downtime.

PUSH TO CONNECT

Parker legris' comprehensive portfolio of plastic push-to-connect fittings for industrial low pressure fluids transfert, including patented LF 3000® pneumatic fittings, for low pressure fluids transfert is the most intuitive and efficiency way of connecting tubes to a fitting in order to create a fluid distribution network. Thanks to its quick installation, versatility and exceptional lifespan, the plastic push-in fitting contributes to improving machine efficiency and cost reduction. All of our plastic push to connect fittings are available with a wide selection of configurations and plastic materials suitable for a wide of fluids among other things compressed air, gas, water, food liquids and beverages or chemicals, that serve across many of today's major industrial markets.
