

Since 1990, Seametrics has been providing high-value flow meters and controls.

The guiding principles have been common sense, simplicity, economy and durability. They started with mechanical insertion meters that extended the bottom of the flow range and were easy to repair.

PULSE METERS

FEATURES

- Multiple pulse rates available
- Pulse rate is field changeable
- 105° cold; 194° hot
- No upstream straight pipe

APPLICATIONS

- Cooling tower chemical control
- Industrial water treatment
- Deduct metering
- Pacing metering pumps

ELECTRONIC METERS

FEATURES

- Flow rates from .07 to 40 GPM
- Pulse output (optional 4-20 mA)
- Polypro, Teflon, Stainless & Brass
- Jewel bearings

APPLICATIONS

- Low flow monitoring
- Chemical batching
- Proportional chemical injection
- Fertilizer injection
