

SOR

SOR manufactures a wide variety of mechanical and electronic devices to measure and control pressure, level, temperature and flow – and we're working constantly to improve our product platform. HART® 7 and Modbus RTU protocols are added to the 800 series products with the introduction of the 815PT smart pressure transmitter. The 1100 series magnetic level indicator utilizes the new SOR patent pending vista™ technology which features a 200 degree viewing angle and 250 foot forward viewing distance. Additional products continue to be developed, check back frequently to see all the latest products.
